

% forest cover in 100m buffer of upstream network

- Category: Landcover
- % forested landcover in a 100m buffer of a barrier's upstream functional network. Derived from the [2016 National Land Cover Database](#).
- Forested landcover classes were aggregated separately for northern Maine and southern Maine. In northern Maine, forest cover was defined as deciduous forest, evergreen forest, mixed forest, and woody wetlands. In southern Maine, scrub/shrub was also included as a forest class based on input from Merry Gallagher, Maine IF & W.
- Unit: %
- Sort Order: Descending
